

EOL Battery Testing Solutions

Streamlined End-of-Line & In-Line Test Management Systems

A&D
Discover Precision

A&D's battery test systems are perfect for battery end-of-line and in-line testing. Production battery testing requires many intricate tests that must be executed repeatedly, accurately, and quickly. A&D's battery testing solutions will help simplify the process by integrating solutions that reduce the complexity of controlling the specialized battery test equipment.

Future-Proof Integration with New or Existing Systems

A&D software can work with any 3rd party test equipment. So whether you have a variety of existing equipment on your line or plan to get new equipment, A&D's application engineers can integrate an expandable solution to make the testing process as simple and efficient as possible now and into the future.

Consulting, Vetting, & Procurement of Equipment

A&D has been in the testing and development industry for decades engineering solutions for hundreds of different applications. We are very familiar with what types of testing equipment are required and which suppliers have the most trusted and reliable products on the market. Avoid the time and hassle of getting numerous supplier quotes and dealing with multiple purchase orders by letting A&D put together a package that fits your testing needs.

Manage A Variety of Data & Test Equipment on One Platform

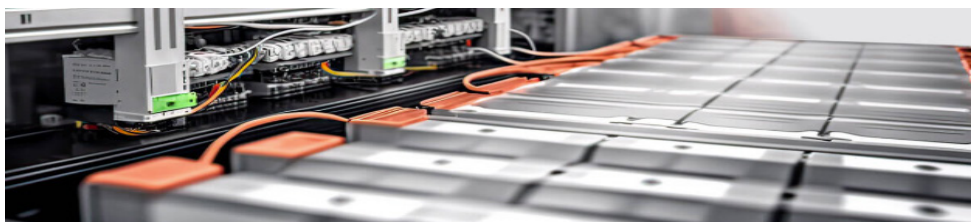

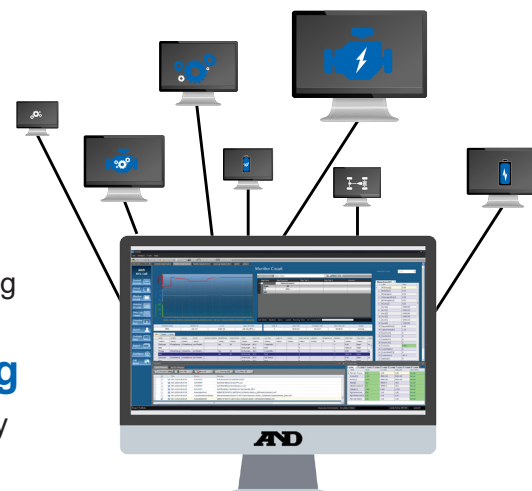

A&D's LabWorx integrated suite of lab management tools can be integrated into any test system to help manage the large amounts of data generated by production battery testing.

Program Automated Test Sequences

A&D's iTest.BTS Battery Test Automation System provides a flexible and easy to use test automation platform. Whether testing cells, modules or fully assembled packs, A&D can implement a dependable custom solution, providing reliable results test after test.

USA-Based Assembly, Service, Support, & Training

A&D Technology is Based in Michigan, USA and has offices around the country and the world.
