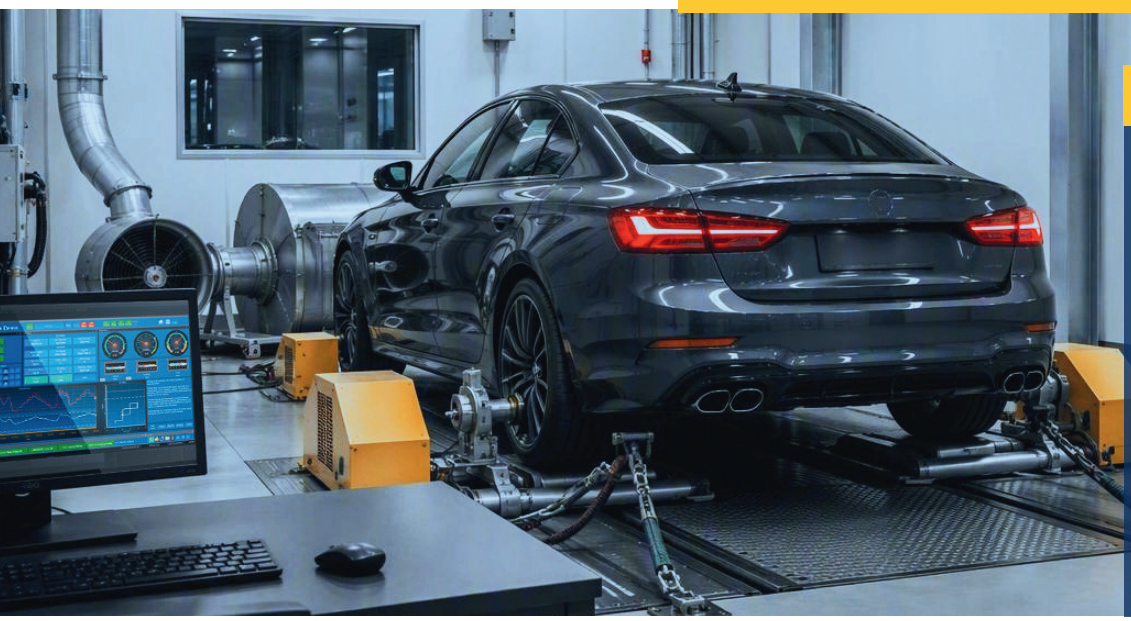
Discover Precision

A&D TECHNOLOGY

Automate More. Integrate Everything. Test Efficiently.



Services & Solutions

- Test System Integration
- Test Automation
- Lab Management
- HILS Simulation
- Combustion Analysis
- Data Acquisition
- Materials Testing
- Emissions Testing
- Engineering Studies

Integrated hardware, software, and engineering solutions that bring together people, processes, and systems to accelerate innovation and improve test efficiency.

Proven Test Expertise

- Over 40 years of test system innovation and ongoing software development
- 2,000+ installations worldwide
- Trusted by OEMs, Tier 1 suppliers, research institutions, and independent test facilities across a variety of industries

Engineering Partnership

- Complete project lifecycle support
- Consulting, on-demand programming, project management, integration, training, and support
- Experienced test cell engineers who solve complex challenges, improve efficiency, and reduce costs

Flexible Solutions

- Vendor-agnostic open architecture
- Integrates with existing equipment and future technologies
- Scale from a single test cell to a global network of connected test facilities.
