

Safety Belt

Software Protection Program

Secures the value of today's laboratory management system

The environment in which today's test laboratories are working is changing faster than ever. In order to allow for quick incorporation of new requirements, the systems that support the test cell must be kept up to date at all times.

Safety Belt achieves exactly this by providing the latest technology advancements that are driven by upcoming market requirements. Regular software upgrades will ensure the compatibility with the actual industry-standard operating system and will keep the down time for upgrading the system capabilities to a minimum.

A&D's Safety Belt secures the initial laboratory investment at a minimal yearly fixed cost.

The program also includes access to A&D's Help Desk for diagnostic and technical assistance, as well as to the Customer Portal. The portal is an online library containing the latest documentation, user guides, application notes and technical papers. It also provides easy access to the latest software updates and patches.

Benefits

- Secures investment dollars at a minimal yearly fixed cost
- Ensures the system is operating at the most up-to-date level
- Keeps the system compatible with the latest technology
- Minimizes downtime for required upgrades
- Customer/Portal provides easy 24/7 access to the latest updates and documentation

The screenshot displays the LabCentral Server web interface. The main content area shows a table of test data search results. The table has columns for Name, Project, End Time, Size, Test System, and Test Result. The results list various data files (e.g., Durability_65_585_Trans.dat) and a PowerMap_DemoTrans.pdf file which has a 'Pass' result. The interface includes a sidebar with filters for Date Range, Projects, Test System, Test Result, and Test Request. The status bar at the bottom indicates the system is up and running.

Name	Project	End Time	Size	Test System	Test Result
Durability_65_585_Trans.dat	PZ-003	2014/02/05 02:44:32	255429	Engine 01	
Durability_65_584_Trans.dat	PZ-003	2014/02/05 02:43:31	255430	Engine 01	
Durability_65_583_Trans.dat	PZ-003	2014/02/05 02:42:30	255433	Engine 01	
Durability_65_582_Trans.dat	PZ-003	2014/02/05 02:41:28	255436	Engine 01	
Durability_65_581_Trans.dat	PZ-003	2014/02/05 02:40:27	255437	Engine 01	
Durability_65_580_Trans.dat	PZ-003	2014/02/05 02:39:26	255434	Engine 01	
Durability_65_579_Trans.dat	PZ-003	2014/02/05 02:38:25	255434	Engine 01	
Durability_65_578_Trans.dat	PZ-003	2014/02/05 02:37:24	255436	Engine 01	
PowerMap_DemoTrans.pdf	PowerMap_Demo	2014/02/05 15:25:30	32594		Pass
PowerMap_DemoTrans.jpg	PowerMap_Demo	2014/02/05 15:25:29	99328		
PowerMap_DemoTrans.csv	PowerMap_Demo	2014/02/05 15:25:27	2725		
PowerMap_DemoTrans.dat.nc2	PowerMap_Demo	2014/02/05 15:25:26	894976		

A&D's Safety Belt for LabWorX protection program ensures your system is up-to-date with the latest features and functionality available.
