

## Safety Belt for ADX Simulation Systems

Software Protection Program

### Secures the value of your simulation and control systems

The ever-increasing requirements for engine and vehicle performance have pushed OEMs and suppliers to continually develop and improve automotive control features. To allow for efficient design, testing and to shorten the product development time, powerful simulation and control systems are indispensable. These systems should keep up with the latest technology advancements and satisfy the upcoming market requirements.

To guarantee your simulation and control systems are in synchronization with the latest technology advancements, and to minimize the downtime for upgrading, A&D offers the Safety Belt Software Protection Program for the ADX simulation

and control system. With this program, regular software upgrades will be provided to ensure your system is always up-to-date with the latest releases. At a minimal yearly fixed cost, A&D's Safety Belt program secures your initial investment, keeps you current with the latest technology, and relieves you of the concerns of system malfunction due to outdated software.

The program also includes access to A&D Technology's Help Desk for technical assistance, as well as to the Customer Portal. The portal is an online library containing the latest documentation, user guides, application notes and technical papers. It also provides easy access to the latest software updates and patches.

### Benefits

- Secures investment dollars at a minimal yearly fixed cost
- Keeps the system compatible with the latest technology
- Includes access to the latest versions of:
  - Firmware
  - Development Environment
  - Virtual DSP Console
  - Function Packs
- Minimizes downtime for required upgrades
- Customer/Portal provides easy access to the latest updates and documentation
- Reduced rates for engineering services for simulation and control applications
- Help Desk support included
- Reduced rates for standard training classes

A&D's Safety Belt software protection program for the ADX simulation and control platform ensures your system is up to date with the latest features and functionality

Software Protection Plan for ADX Simulation Systems

## Program Pricing

Single system	\$3895 annually
2 - 5 systems (unit price)	\$3695 annually
6 or more systems (unit price)	\$3495 annually

Note: A 5-year bundle program is available that includes a 10% discount off the total price.
