

Simplify Test Cell Upgrades

Maximize Benefits & Minimize Costs with A&D Software

Overcome typical test cell upgrade challenges with A&D test cell management and automation software. Our “iTest” test automation software, “Orion” auto calibration software, and “LabWorX” lab management software will always be compatible with most existing current and future testing systems which saves time, money, and frustrations during test cell upgrades.

ORION

Independent Systems Minimize Time & Money Spent Satisfying OS Updates

Our software connects to existing systems and is built independently from hardware equipment making it easy and cost effective to meet users' regular OS Update requirements.

Stay Compliant with Latest Regulations

A&D's flexible software works with a variety of current and future measurement systems making it easy to meet the latest regulations and energy requirements.

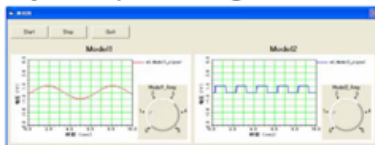

Save Money by Managing & Automating Existing Systems

Use the versatile software to manage existing systems, automate measurements, and add vehicle driving simulation functions.

Save Time with Pre-Configured Software

Our engine bench standard software always has the industry's latest system pre-configured.

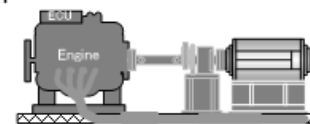

Remote Operation & Support

Our test automation and server systems allow A&D bench tests to be operated and supported remotely.

Joint Consulting & Development

We are not only experts on our own A&D systems. We also have years of experience collaborating with third parties to plan solutions.
